

INTELLIGENT INFORMATION SECURITY

www.TrofiSecurity.com

Every day new threats arise from both expected and unexpected sources — cyber-attacks on your network, social engineering attempts against your users, lost or stolen devices, accidental sensitive data leakage and even malicious insiders. **Trofi Security** offers organizations the management experience and technical expertise required to address all aspects of a successful information security program.

Our focus is on providing advisory, assessment, and remediation services based on the specific security risks impacting your organization. Based on an analysis of your company's risk profile, industry specific threats, and identified vulnerabilities, we work with your organization to mitigate your risks, while moving your organization to a higher level of compliance with relevant regulations and industry standards. Our consultants have the tools and expertise to develop cost-effective, security and compliance improvement plans, tailored to your business — *that's* intelligent information security.

OUR REGULATORY EXPERTISE INCLUDES:

PCI-DSS | ISO\IEC 27001 | HIPAA\HITECH | FISMA\FEDRAMP | FFIEC | SSAE16 | SOX
