On-Demand Executive Technology Expertise

www.TrofiSecurity.com

As organizations grow, IT strategy becomes more complex. Technology and data proliferation, workforce distribution, market expansion, regulatory pressure and broadening cyber exposure are just the tip of the iceberg for organizations of all sizes. These IT challenges demand the formulation not only of a cohesive set of corporate IT policies and standards, they demand seamless continuity between strategy and execution.

While most small- and mid-sized organizations have sufficient coverage for their network or desktop support, many lack the higher-end expertise typically filled by a Chief Technology or Chief Information Officer. These key positions require significant business experience and technical depth in order to sufficiently address the breadth of today's IT challenges. Unfortunately, full-time, executive-level technology expertise is often far more expensive than many organizations can justify or afford.

Affordable. On-Demand. Executive Technology Expertise.

Founded in 1999 by experienced IT professionals, Trofi Security offers its **Virtual Chief Technology Officer (vCTO)** services to assist small- and mid-sized organization in getting the help they need. Our senior-level consultants bring a wealth of knowledge to your organization based on hands-on experience, industry best practices, and deep industry relationships. Our vCTO services are tailored specifically for your organization, to ensure you get exactly the expertise you need, at a price that makes sense for your business.

vCTO Services from Trofi Security ensure your organization gets the guidance it needs:

STRATEGY

- Enterprise Governance, Risk & Compliance (GRC)
- Business Technology Roadmaps
- Corporate IT Policy
- IT Budgeting
- Board & Investor Relations

DESIGN
